Exception thrown and not caught jquery 3.2.1 with Bootstrap 4 #3948

 Open GearTheWorld opened this issue 3 days ago · 11 comments

GearTheWorld commented 3 days ago

I have an MVC 5 app with bootstrap 3.3.7 and JQuery 3.2.1

When I use Nugget to update to bootstrap 4.0.0 the application crashes immediately with the error

Exception thrown and not caught

When I downgrade the Bootstrap to 3.3.7 everything works perfectly. Is there something I don't understand or there's definitely something wrong between JQuery 3.2.1 and Bootstrap 4.0.0 ?

dmethvin commented 3 days ago

Owner

There were some things the issue template asked for that are not on this ticket. Can you provide a test case?

GearTheWorld commented 3 days ago

What is a test case

What I liked about this bug report (up to 3 short characteristics):

- The place where others can comment and make the conversation
- Easy sign up for free
- I can see all participants in the conversation

What I would have liked this bug report to contain (up to 3 characteristics):

- Better to join the conversation without sign up
- More information for the bug

If possible, how would you rewrite the title of the bug report to make it clearer and more informative?

Error when using Nugget to update to bootstrap

If possible, how would you rewrite the description of the bug report to make it clearer and more informative?

I am using an MVC 5 app with bootstrap 3.3.7 and JQuery 3.2.1. There is the error when I use Nugget to update bootstrap 4.0.0 applications crashes which is exception thrown and not caught. Downloading the bootstrap to 3.3.7 is working perfectly but there is something wrong between JQuery 3.2.1 and Bootstrap 4.0.0.

Bug Report #2

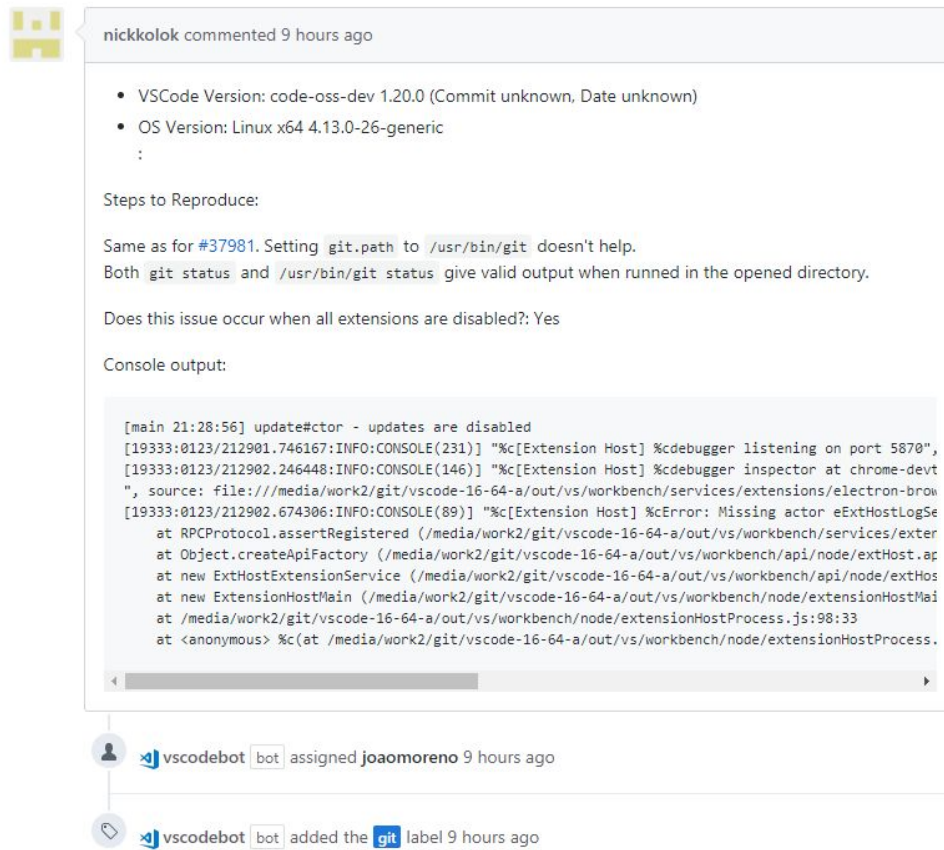

Software system: Visual Studio Code

- VSCode Version: code-oss-dev 1.20.0 (Commit unknown, Date unknown)
- OS Version: Linux x64 4.13.0-26-generic

Steps to Reproduce:

Same as for #37981. Setting `git.path` to `/usr/bin/git` doesn't help.
Both `git status` and `/usr/bin/git status` give valid output when runned in the opened directory.

Does this issue occur when all extensions are disabled?: Yes

Console output:

```
[main 21:28:56] update#ctor - updates are disabled
[19333:0123/212901.746167:INFO:CONSOLE(231)] "%c[Extension Host] %cdebugger listening on port 5870",

What I liked about this bug report (up to 3 short characteristics):

- Information about the steps to reproduce
- Information about the console output
- Information about his using VSCode version and OS version

What I would have liked this bug report to contain (up to 3 characteristics):

- More specific information about the occurring issue
- Better to join the conversation without sign up

If possible, how would you rewrite the title of the bug report to make it clearer and more informative?

Git issues when all extensions are working

If possible, how would you rewrite the description of the bug report to make it clearer and more informative?

There are three steps to reproduce: start latest VS Code, go to source control panel, and get the message "There are no active source control providers". So, I was setting git.path to /usr/bin/git but it was not working. Both git status and /usr/bin/git status give valid output when runned in the opened directory.

Feature Request #1

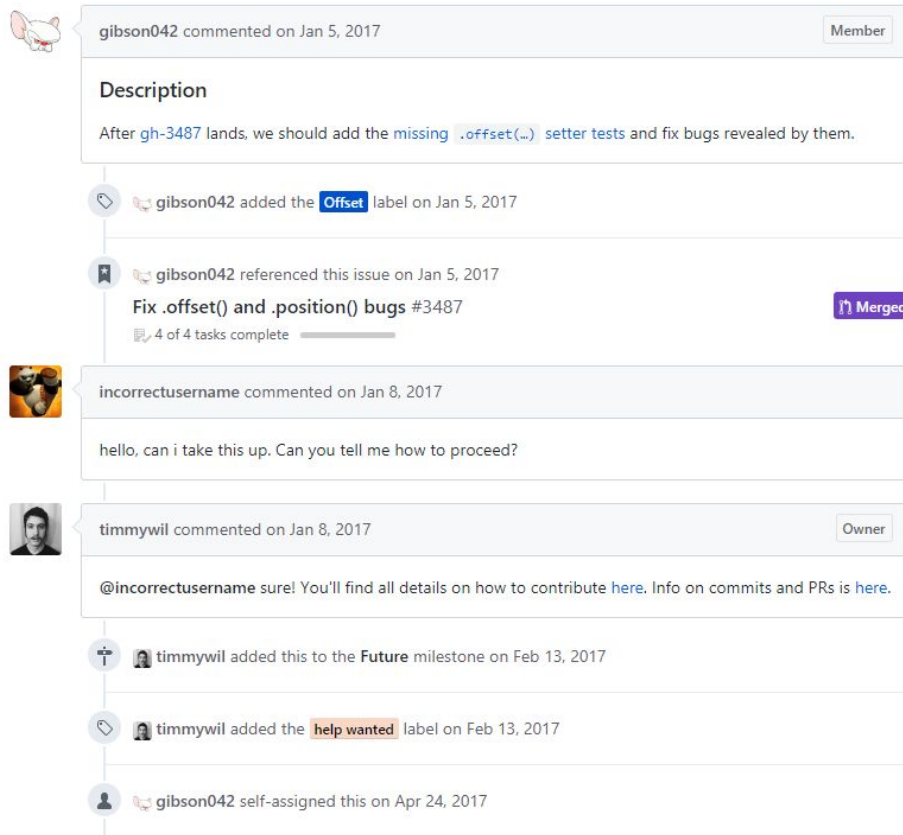

Software system: JQuery

Screenshot of bug report title and description:

Improve .offset(...) setter testing #3488

 **Open** gibson042 opened this issue on Jan 5, 2017 · 4 comments

 gibson042 commented on Jan 5, 2017 Member

Description

After [gh-3487](#) lands, we should add the missing `.offset(...)` setter tests and fix bugs revealed by them.

 gibson042 added the **Offset** label on Jan 5, 2017

 gibson042 referenced this issue on Jan 5, 2017

Fix .offset() and .position() bugs #3487 Merged

 4 of 4 tasks complete

 incorrectusername commented on Jan 8, 2017

hello, can i take this up. Can you tell me how to proceed?

 timmywil commented on Jan 8, 2017 Owner

@incorrectusername sure! You'll find all details on how to contribute [here](#). Info on commits and PRs is [here](#).

 timmywil added this to the **Future** milestone on Feb 13, 2017

 timmywil added the **help wanted** label on Feb 13, 2017

 gibson042 self-assigned this on Apr 24, 2017

What I liked about this feature request (up to 3 short characteristics):

- Attached 'help wanted' label in the comment
- Added the Offset label with Merged label
- I can see all participants in the conversation

What I would have liked this feature request to contain (up to 3 characteristics):

- I need more specific information for the bug
- More information for fixing the bug
- Better to join the conversation without sign up

If possible, how would you rewrite the title of the feature request to make it clearer and more informative?

Add missing offset setter

If possible, how would you rewrite the description of the feature request to make it clearer and more informative?

.offset() makes always relative to the document and .position makes always relative to the closest containing block offsetParent. After this, I should add the missing .offset setter because it fixes bugs revealed by them.
